
Recommendation Letter for BUI Minh Tien

It is my great pleasure to recommend M. BUI Minh Tien who has successfully graduated from the Master Preparation Program operated by Vietnam Center of Research in Economics, Management and Environment (VCREME). The Master Preparation Program followed by M. BUI Minh Tien provided 4 main courses (Mathematical Economics, Econometrics, Microeconomics, Macroeconomics). The objective is to reinforce mathematical and economics backgrounds for students who are interested in studying further either in Vietnam or abroad.

I accept to recommend students who get an average grade over 13/20 mark, at least 10/20 mark in each course and for Mathematics not less than 13/20 (a student who gets between 10 and 12/20 is considered as relatively good, between 13 and 15/20 as good, between 15 and 17/20 as very good, and above 17/20 as excellent).

Here are the grades that M. BUI Minh Tien got at our exams: 15/20 for Macroeconomics (taught by Ly Dai Hung, Vietnam National University, Vietnam), 14/20 for Econometrics (taught by Nguyen Manh The, National Economics University, Vietnam), 17.5/20 for Mathematics (taught by Nguyen Bang Giang, National University of Civil Engineering, Vietnam), 19/20 for Microeconomics (taught by Le Van Chon, International University, Vietnam). The average grade is 16.37/20. M. BUI Minh Tien is a very good student.

Based on the results M. BUI Minh Tien obtained, I strongly support his application.

With my best wishes

Cuong LE VAN

Research Director Emeritus at the French National Center for Scientific Research
Professor Emeritus of Paris School of Economics

Leipzig, 12 October 2014

To whom it may concern

As a Professor at Leipzig University of Leipzig, I have known Bui Minh Tien for more than two years as he used to be an excellent student in a MBA program of which I was the director.

I highly recommend Bui Minh Tien as an outstanding candidate for employment. Tien has been employed by one of the first-class banks in Vietnam as an IT specialist since 2011. His main duty is to manage the bank's information system and data warehouse. At his job he deals with a number of banking software and he has a lot of skills and experience in building and implementing IT projects. Tien has done a lot of research on IT implementation in the banking environment and his talent is acknowledged by a number of prizes he received at the university and the workplace.

At all times I have found him to be honest, reliable and well-organized. He can speak English fluently and has a good communication as well as team-building skills. He is hard-working and he can work independently under pressure. He always has eagerness and keenness to learn, which enables him to quickly adapt to a new working environment. In addition, Tien is flexible and he is willing to work on any project that is assigned to him as well as in different areas of company operations.

I believe that his skill, experience and talent would prove very useful for your company. If you have any further questions with regard to his background or personality, please do not hesitate to ask me.

Yours sincerely,

Prof. Dr. Utz Dornberger
